

ACTIVE DOCUMENT PORTAL

S I A V

THE SIAV SOLUTION

for automatic publication
of documents on the company portal

Immediate and secure accessibility for your documents

COMPANY PORTALS ARE A FUNDAMENTAL TOOL FOR COOPERATION AND FOR SHARING INFORMATION AT AN INTERNAL AND INTER-COMPANY LEVEL

CONTEXT AND SOLUTION

Active Document Portal (ADP) is a solution integrated with the Siav Archiflow platform, that can be used by any company to publish its documents on the Internet or Intranet in an easy, dynamic and secure way.

ADP is an optimized document publication portal, and can be integrated with the existing company website. Using a high level graphic configuration tool, ADP enables you to publish documents, information and content present in company document systems. The versatility of the configuration means you can set publication rules and guarantee secure and confidential access to information.

ADP can extract documents from the document archive and publish them without duplicating the information and without the intervention of the person in charge of their content, which means you can define extremely detailed rules for viewing and accessing documents.

ADP OVERVIEW

Functions

- Log in under single sign-on mode.
- Easy integration of web pages created by ADP thanks to the layout that can be perfectly harmonized with the company's website style.
- List of accessible documents based on rules defined during configuration: the ADP module queries the Archiflow engine to extract the list of documents the user can consult.
- Tree structure to group related documents and to make navigation easier.
- Download tracked documents to make them available locally.

Configuration module

The ADP module is made up of a configuration element that is simple and intuitive and allows the user to define the type of document to be viewed, research criteria, list of indices to be viewed, the hierarchy of visible documents and access rights. Some selections can be set in a dynamic mode. The publication can be submitted to an approval process using the Siav Archiflow platform.

Presentation of results

ADP is a complete solution capable of publishing documents, even when a company website is unavailable, based on the user's profile login, applying rules set during configuration. It is easy to integrate ADP into the company website, if desired - all you have to do is add the link to the interface pages of the Document Portal.

Key Points

- Developed with the most modern ASP.Net development technology
- Fully compatible with the most widely used databases on the market
- Native integration in the Siav Archiflow platform
- Simple and intuitive configuration
- Immediate and user-friendly thanks to its tree structure navigation
- Secure: documents remain in the company repository until download, which is tracked in the log
- Management of the organization chart, which can be imported directly from the customer's personnel register
- Easily integrated with the existing company website
