PRESS RELEASE

SIAV ENTERS INTO A STRATEGIC PARTNERSHIP WITH MONDEVO GROUP FOR THE IMPLEMENTATION OF A GLOBAL AI-INTEGRATED DOCUMENT MANAGEMENT PLATFORM

The supply of the innovative SIAV Connect platform will ensure Mondevo Group high security standards in data management, as well as traceability and multi-jurisdiction regulatory compliance.

Rubano (PD), February 18, 2026 - **Siav S.p.A. Società Benefit** (the "**Company**" or "**SIAV"),** leader in Italy in the Enterprise Content Management sector, listed on the Euronext Growth Milan (EGM) market, announces that on 17 February it entered into a **three-year partnership with Mondevo Group** (also the "Mondevo Group"), a global financial and technology group headquartered in Abu Dhabi, serving Family Offices operating in multiple jurisdictions.
The partnership aims to improve security standards in data management, traceability and multi-jurisdictional regulatory compliance within the Mondevo Group's processes through the adoption of the SIAV Connect software platform.
The agreement, with a total value of approximately 190,000 dollars (approximately 161,000 euros), represents a strategic milestone for SIAV, representing **the first partnership launched outside the EU** that will contribute significantly to future growth and increase the Company's visibility internationally.

Specifically, **ITTIKAR** – Mondevo Group's global investment platform – will adopt **SIAV Connect** to support its proprietary Augmented Data Room. The combination of enterprise-level document governance and proprietary AI infrastructure will enable ITTIKAR to set a new standard in intelligent investment operations management, offering partners greater efficiency, transparency, and control throughout the entire process.

The solution provides a secure and scalable infrastructure for the structured management of documents related to investment transactions, ensuring **role-based access control**, **data segregation**, **full audit trails**, and governance throughout the entire document lifecycle.

Built on the document layer of **SIAV Connect**, ITTIKAR's Augmented Data Room integrates proprietary AI agents capable of supporting **Family Offices** in due diligence and transaction execution processes through assisted analysis of financial, legal, and operational documents, automated synthesis of insights, contextual search, and intelligent workflows.

The **SIAV Connect** platform will serve as the technological foundation for the centralized and secure management of Mondevo Group's information assets and will also enable process automation in the areas of investment, legal, compliance, and operations, fostering structured collaboration among the various international entities.

The integration between **SIAV Connect** and Mondevo Group's proprietary **AI Agent** infrastructure will transform document management into an active engine of operational intelligence. AI agents will be able to automatically classify documents, extract key information, trigger workflows in real time, support compliance and reporting activities, and provide contextual access to institutional knowledge, thereby improving efficiency and decision-making capabilities.

The **partnership** will enable Mondevo Group to standardize and automate document management, reducing manual processes and operational risks, accelerating the execution of critical workflows, and strengthening transparency and governance. At the same time, for SIAV, the agreement not only represents the first partnership in the UAE area, with a positive impact on the Company's international visibility, but also lays the groundwork for a gradual development of the initiative toward third-party clients already active in markets currently served, thereby expanding growth prospects both nationally and internationally.

Nicola Voltan, CEO of SIAV, commented**:** *"We are proud to support Mondevo Group on this journey. Connect is designed to ensure control, security, and intelligent enhancement of information assets, while enabling advanced integration and automation. Supporting an AI-native organization like Mondevo confirms the strategic role of our platform in highly complex global financial environments."*

Hussam Otaibi, Founder of Mondevo Group, stated: **"***The partnership with SIAV represents a strategic step in building an AI-native financial infrastructure designed to meet the evolving needs of Family Offices worldwide. The adoption of Connect strengthens a secure, intelligent, and scalable operational backbone, enabling us to transform information into actionable intelligence for the benefit of our clients."*

Cristiano A. Motto, Chief Technology Officer of Mondevo Group, added: *"Information is the true engine of every intelligent organization. With Connect, we are creating a unified and secure knowledge layer that integrates natively with our AI architecture. This enables our AI agents to interact with corporate documents in a structured and governed way, unlocking advanced automation, real-time intelligence, and fully orchestrated workflows across the entire Group. This is a fundamental element in building a truly autonomous and intelligent operational infrastructure."*
